1 Membership dues in The Transportation Alliance are for the calendar year and may not be deducted as a charitable contribution, but may be deducted as a business expense, except that twenty percent (20%) of your dues, which will be used for lobbying, is not tax deductible under U.S. law.

2 Dues are based on the number of passenger vehicles (taxicab, livery, NEMT, paratransit, shuttle, luxury, bus, etc.) operating in an organization's system. TTA dues cover all vehicles connected with member operator's organization(s). That means that all passenger vehicles receiving any service whatsoever from the member operator or from the operator's organizations (company, cooperative, association, dispatch service) that operate within 75 miles of your organization's location are covered. This includes independents, affiliates and/or associates who own their own vehicles and/or their own permits and simply purchase dispatch or insurance or some other service from the member operator's organization(s).

3 Since many fleets either trade under several different names and/or different corporate structures, it is required that all of these diverse entities that are affiliated with the operator, or the operator's management team, and which are located within 75 miles of the member organization(s), are covered by TTA dues. The organization can have each affiliated transportation service join TTA independently or all services operating within a 75-mile radius can be amalgamated into one large member, but all of them must join for any one of them to join.

4 A National Membership covers up to ten separate locations operated by a regional or national passenger transportation company, with each of the up to ten locations receiving member benefits.
